

HARROWELL

For owner-run UK distributors, retailers and manufacturers of 50 to 500 people

We build AI into one division of your business, and we're measured on that division's own numbers.

We find the one workflow that slows a division down, build the system that fixes it, run it for you, and report the division's KPI every month.

If we don't find anything worth doing, we'll tell you and leave.

WHAT YOU GET

A verdict, a working system, and a number every month.

1

A one-page verdict

The workflow to fix, the KPI it moves, today's baseline and a fixed price. Or a written no.

2

A working system

One workflow, built by us and connected to the systems you already use. Your people approve its work before anything goes out.

3

A monthly report

We run the system and report the KPI against its baseline every month.

HOW IT WORKS

From first call to a live system in weeks.

30 MINUTES

Call with you

Where work piles up, and which number it holds back.

1 HOUR

Session with your team

We see the work first hand. You get the one-page verdict the same day.

A FIXED NUMBER OF WEEKS

Build

The timeline and fee are on the verdict before you commit.

EVERY MONTH

Run and report

We run the system and send the report. Stop at any report.

TERMS

Agreed in writing before we build.

Price

Fixed. On the verdict, valid for 30 days.

Payment

Build: half at signing, half at go-live. Running the system: monthly, in advance.

Contract

Month to month once live. You can stop at any report.

What we commit to

The system live as scoped, and a report every month. Results we measure honestly; we don't promise them.

Who does the work

We do. Nothing is subcontracted.

CONTACT

Book thirty minutes.
